

FILE VAULT / LOCAL REVIEW

Synthetic preview document

This PDF is a deterministic browser test fixture.
It contains no student information.

YOUR DOCUMENTS. YOUR JOURNEY.

A private workspace keeps each document organized,
with its current version and an immutable history.

The production application requests a short-lived
private preview from its existing authorized API.

This local file demonstrates the same browser viewer.
It does not establish a production signed-delivery test.

Prepared for the October 2026 visual acceptance.
